Profile Description

Sivakumar.S.K has more than **24 years** of professional experience in IT spanning different facets – Consulting, Architecting, Transformation, Migration and Design of software systems in multiple domains.

Currently Siva is donning the role of Head, Corporate Rapid labs which is part of Research & Innovation Incubation unit of TCS. Earlier he was Champion in Industry Advisor Group of Travel, Transportation and Hospitality IOU. He is handling Machine vision technology to redefine transport and travel industry. Two of his innovations are shortlisted in TATA innovista2 020. He had published Digital Exponential table for Machine vision depicting trends for 2030, which had won him TrendSpotter Award.

Earlier he worked for Retail Innovation lab & **IoT Incubation (CTO)** team for last 5 years. As alliances lead his responsibilities include to create joint GTM plans, prepare IoT strategy plans for customers, identifying the start – ups, defining joint plans. He successfully created 2 business blue print documents for leading chipset manufacturer which is joint execution of TCS and partner. Apart from Alliances lead, Siva has deep understanding and entrepreneurship skills. He created Smart hook and Smart shelf solutions by crowdsourcing the TCS associates. Siva had completed Bosch M2M certified (Device Management) Associate. He also conducted Hackathons for partners and mentored the teams.

Earlier he worked on **IT strategy consulting** for GCP (Global consulting practice) team. Siva is basically an **integration architect** for multiple projects within TCS. Siva was lead integration architect for one of major Saudi Arabia's airline customer where he was instrumental in designing multiple interfaces between Passenger management solution & ground handling and Cargo solutions.

From technical perspective, Siva acquired **14 certifications**. On architecture, Siva is **TOGAF** certified architect. On Integration front, he got many certifications on IBM integration suite of products – Interchange server, Message broker, MQ. On SOA front, he is **SOA certified** designer. Apart from technical side, he is **PMP** certified professional from program management front.
